## ATAL EMISSION STATION

ATAL has a 30-year tradition in the development and manufacture of emission devices for internal combustion engines. ATAL emission stations (for a transitional period ACTIA) are successfully exported to many countries in Europe, Asia, South America and Africa.

- ✓ ATAL is preparing a completely new set of 3rd generation emission devices for 2024
- ✓ For the design of the new Gas Analyser (AT 508) and Smoke Meter (AT 608)
- ✓ ATAL is using its own optical measurement system designs using state-of-the-art electronic components
- ✓ These unique solutions are protected by several applications inventions.

# OPACIMETER PROBE EXTENSION AT 104 6007

- ✓ Probe extension
  - Length 2200 mm
  - Weight 3,5 kg
  - Handle for easy use
  - Connection of heating system

- ✓ Power supply
  - Input 100-240V
  - Output 24V / 6.6A
  - Weight 0,5 kg max
  - Dimensions 160 x 100 x 40 mm
